This document is provided as a supplement to the *MMA Reference Manual* which lists all of the commands in the program and helpful information which can be used to create your own “style” files. If you are a newcomer to *MMA* you should also have a look at the *MMA Tutorial* for some “getting started” information.

The information in this manual has been generated directly from the library files included in the standard distribution. Each section uses the filename as a header and then lists the various defined grooves.

You should be able to use any of these grooves in your files without using other directives. However, if you have files in non-standard locations you may need to properly set the library path in a *MmaRC* file with the *SetLibPath* directive or by explicitly loading the library file(s) with a *Use* directive.

The filenames are in all lowercase. These are the actual filenames used in the library. If you are loading files with the *Use* directive you must use the same case.<sup>1</sup>

Following each groove description is a boxed number in the form **4**. This indicates the sequence size of the groove. Next, is a list of tracks and instrument names. This shows the first voice or drum note defined for each track—it is quite possible that the track uses other voices. This data is included so that you can see what tracks are active.

The library files supplied with *MMA* contain embedded documentation. The **-Dx MMA** command line option extracts the following information from the each library file:

- ♪ The filename from the “Doc File” directive.
- ♪ The file description from the “Doc Note” directive.
- ♪ Each groove description: This is the optional text following a *DefGroove* directive.
- ♪ The sequence size. This is extracted from the current groove information and was set with the *SeqSize* directive. It is displayed in a small box after the groove description.
- ♪ A “summary” of the voices used in the groove. Note that a different voice or MIDI note is possible for each bar in the sequence size; however, this listing only lists the selection for the first bar.

---

<sup>1</sup>Please note that typographic case applies only to the filename (this is operating system dependant). GROOVE commands are case-insensitive.

During the development of *MIA* the library files have improved to the point of being quite reasonable. They never will substitute for professional players, but that never was the intention.

Still, some of the files need some help. Some, frankly, need quite a bit of help. Hopefully, you, the intelligent user, will make them better and share the results with the ever growing *MIA* community. Thank you!

## 2.4 68swing

A swing rhythm in 6/8. This is implemented with 6 beats to the bar. If you want to use solos written in standard notation set the STRETCH variable to 200; or convert the 8th notes to quarters, etc. Since most 6/8 tempos are specified in 2/4 you'll most likely want to use a tempo three times what you might think. Also, note that when setting chord lines you'll want the second chord (which the conductor would beat at "2") at position 4 (ie "C // G"). Written for "Hey, Look Me Over".

## 2.6 afro-cuban

Afro-cuban rhythm in 6/8 time. Pretty much completely from Victor Lopez (Latin Rhythms). This probably isn't the greatest Afro-Cuban rhythm ... but it does sound fairly descent. If you understand this stuff, please help!! This is implemented as a 3/4 time, which means that your 6/8 melody notes will fit in perfectly.

## 2.7 arpeggio44

A simple set of arpeggios in 4/4 time. Great for lesson pieces and lullabies. See the example song “Traumerei”. Remember that for the following variables to take effect they need to be set before loading any Groove in the file or after a GrooveClear. Setting the variables is important! The default is for only a single note arpeggio with no harmony or bass.

### Variables

**Harmony** Sets the Harmony used for the piano. Default: None.

**Direction** Sets the arpeggio direction. Default: UP.

## 2.8 arpeggio68

A simple set of arpeggios. Great for lesson pieces and lullabies. Remember that for the following variables to take effect they need to be set before loading any Groove in the file or after a GrooveClear. This groove is based on the “arpegiowaltz” groove. Note when setting chord locations that there are six quarter notes per bar! When doing a solo/melody you’ll find it easy to use 6 eight notes/bar and expand them with a “Stretch 200”. You will need to double the tempo for this to work out right.

### Variables

## 2.17 bluefolk

A very easy folk-type backing with an arpeggiating guitar, bass and simple drums. Written for the Animals version of “House of the Rising Sun” (mind you, the folkblue2 variants seem to be nicer). ## 2.34 **click**

All a click track on top of any groove. Please note the variables listed below and their defaults.

The subroutines ClickOn and ClickOff are created. These can be used in a song file to enable/disable the clicking for sections using the commands “Call Clickon” or “Call Clickoff”.

Notes:

There is NOT a TIME or TIMESIG setting in this groove. We use the existing groove value for that.

Since there is not a “SeqClear” in this file the current groove settings will not be changed. However, the name of the current groove “\$\_Groove” will be “Click”. For this reason, call click before the wanted groove.

### Variables

**ClickTone1**    The drum tone used on primary beats. Default: ShortHiWhistle  
**ClickTone2**    The drum tone used on secondary beats. Default: ShortGüiro  
**ClickPattern**    The pattern 1, 13, 123 or 1234. Default: 1

### **Click**

## 2.46 **eewaltz**

A try at doing something for traditional Slavic, dreary waltzes. We're using a name convention "Eastern European Waltz" simply because "EE" is much shorter than "Russian"). This was written for "Dark Eyes". Note: For strumming we emulate a balalaika which has 3 strings. We using a EEA (Prima) tuning, but you can change this if you want.

## 2.47 **evansish**

This is based on “mellowjazz.mma” and tries to be a bit like Bill Evans (although no one could ever be that great!). The style knocks the roots out of all the piano chords and relies on the bass player for roots. I use this for the example songs “But Beautiful” and “Some Other Time”.

### Variables

Generally folk music doesn't have complicated rhythms. You can use other libraries like "EasySwing", but if you are into finger picking guitar, give this a try.

## 2.53 folkballad

A very simple folk variation for slow songs. I wrote this for a slow version of the Burns poem “A Red, Red Rose”. Uses only a nylon guitar, much like a self-accompanied singer. The harmonica can add some variety with a simple sustain.

Some things just don't fit! This is a soft-of-jazz and sort-of-folk set with a guitar and piano. I'm trying to emulate the background used by Madeleine Peyroux doing "Everybody's Talkin'". The "Piano" set has the guitar replaced with a piano for a different effect.

## 2.57 frenchwaltz

These try to do the “French Cafe” sound. The song “Pigalle” works quite well with this. Note the setting of the BassRegister variable which tries to emulate the “switches” on a real accordion. In this case we have an accordion with three reed banks labeled “L”, “M” and “H”—this will make large changes to the accordion um-pa-pa stuff

### Variables

## 2.64 jazzguitar

For jazz ballads. This has ONLY a guitar (well, expect for the sustained versions). Mostly chords, but some bass and arpeggio is included. The song “Django” is a bit of a demo.

This Groove uses a Plectrum track optimized for songs in the key of C. If the guitar strums sound too high try a command like “AllGrooves Plectrum Capo -2” right after the first “Groove JazzGuitar\*” command to lower the pitch.

## 2.73 mambo

The Mambo was popularized by the great Cuban bandleader Perez Prado. The sample song “Patricia, It’s Patricia” is a decent demo. This file was mostly developed from the patterns in “Latin Rhythms: Mystery Unraveled” by Victor Lopez. The variations in this file are mostly borrowed from the Rhumba library.

## 2.74 march

Sousa would love this file. These all need a bit of work—they tend to sound a bit too ponderous and/or heavy. The sequences assume 4 chords per bar, but most marches are in 2/4 time. So, double the tempo for “proper” results.

### MillIntro4

A 4 bar military-style intro.  
Easy to use if you include a line like “z \* 4” at the start of the piece. **4**

Drum-Snare	SnareDrum1

### MillIntro2

A 2 bar military-style intro.  
This is identical to the MillIntro4, but only uses the first 2 bars of the sequence. **2**

Standard march pattern.  
Boring, but it works. **4**

## 2.90 ragtime

This is simple version of Rag Time accompaniment. It's written in 4/4 time. Since most rags are in 2/4 you'll need to double the tempo to make it work. Don't play too fast (tempos around 200 quarters per second work well)! Note: No drums in this. Just a single piano and some strings for the sustained part.

## 2.94 rock-128

Doo-Wop rock from the 50s. These songs are mostly written in 12/8 time, but this file assumes 4/4. So, when figuring tempo use a dotted quarter for the beat count (of course, if the song is in 4/4 time, then you don't need to figure!). We use this for the song "Sea Of Love".
