

Si Tu Vois Ma Mère

If You See My Mother

This sultry song, written by the soprano saxophonist Sidney Bechet, was first recorded in 1937. It was later featured in the Woody Allen directed fantasy-comedy film *Midnight in Paris* in 2011.

Performance notes: This arrangement should be played in a soft and gentle manner with care taken to make each transition smooth and accurate. Pay attention to the bass notes which generate the pensive motion within the composition. The dynamics and phrasing are left as a choice of the player, but should be executed as smoothly as possible. Above all else, **don't hurry**.
